

Job Point

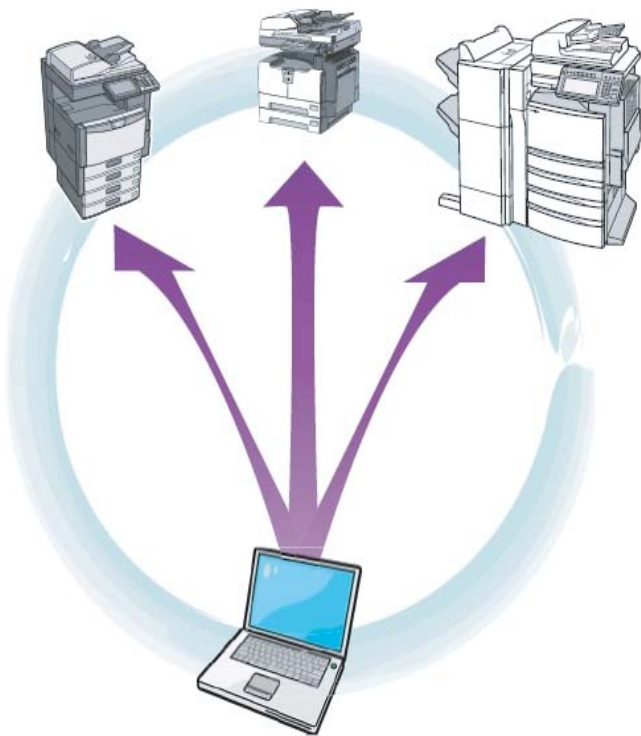

Harness the combined power of
Toshiba Multi-Function Device fleet
to deliver astonishing output speeds.

Time Saving Convenient Rapid output

Toshiba e-BRIDGE Job Point is an utility that is ideal for large print jobs with tight deadlines. Straight forward and easy to use, Job Point automates the process of printing the same document to multiple Toshiba MFPs with a single print job, cutting down the time to complete the job by half or greater.

- Automatically identifies e-STUDIO MFPs available on your network
- Intuitive, easy to use dialog box splits output automatically or by user selection
- Output settings simultaneously reproduced for each device
- Once set, Job Point conveniently remembers settings for future or repeated use

Toshiba's e-BRIDGE™ Job Point allows users to harness the combined power of their Toshiba Multi-Function Device fleet to deliver astonishing output speeds.
