

Replicator

Toshiba's e-BRIDGE Replicator distribute documents to multiple sources automatically. Saving time and reducing workload in the process.

A simple one touch application to streamline the creation of multi-part forms and documents such as invoices, receipts, statements and many more.

To print multi-part forms or documents on a regular basis can be a very painful process.

e-BRIDGE Replicator is a utility that automates the process of printing the same document from more than one paper drawer or input source at the same time. One of the most useful benefits for using e-BRIDGE Replicator is that print settings can be retained for all copies, thus saving time and minimizing hassle.

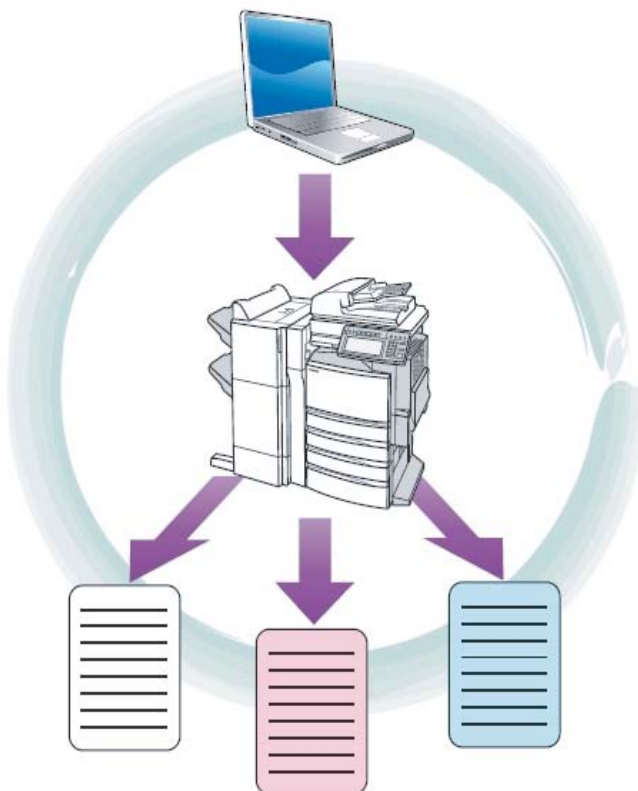

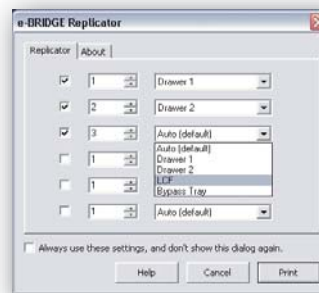

Simply print the same document to multiple paper sources to create different coloured copies for identification.

Reliability :

- No operator intervention to switch forms
- No paper jam
- No tearing of edges

Simplicity :

- Easy to install and configure
- Simple to use interface - print with just a few clicks
