

Smart Data Management

“The NEC Smart Data Management framework is a combination of solutions to help customers understand the importance of data, **optimize their file server management** and, provide **secure and reliable backup/restore** operations, resulting in reduced operating cost & risk and in improved data protection across the organiza-

File Server Management

Disk-Backup Solution

Part 1: Solution for Streamlining File Server Data & Enhancing Security NIAS [NEC Information Assessment System]

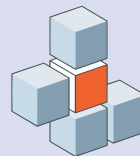

Reporting and Analysis

NIAS reports file server capacity usage in easy-to-understand graphs.

Capacity Reduction

NIAS helps enterprises organize and delete unused data, thereby reducing data capacity by 20 to 30% per year.

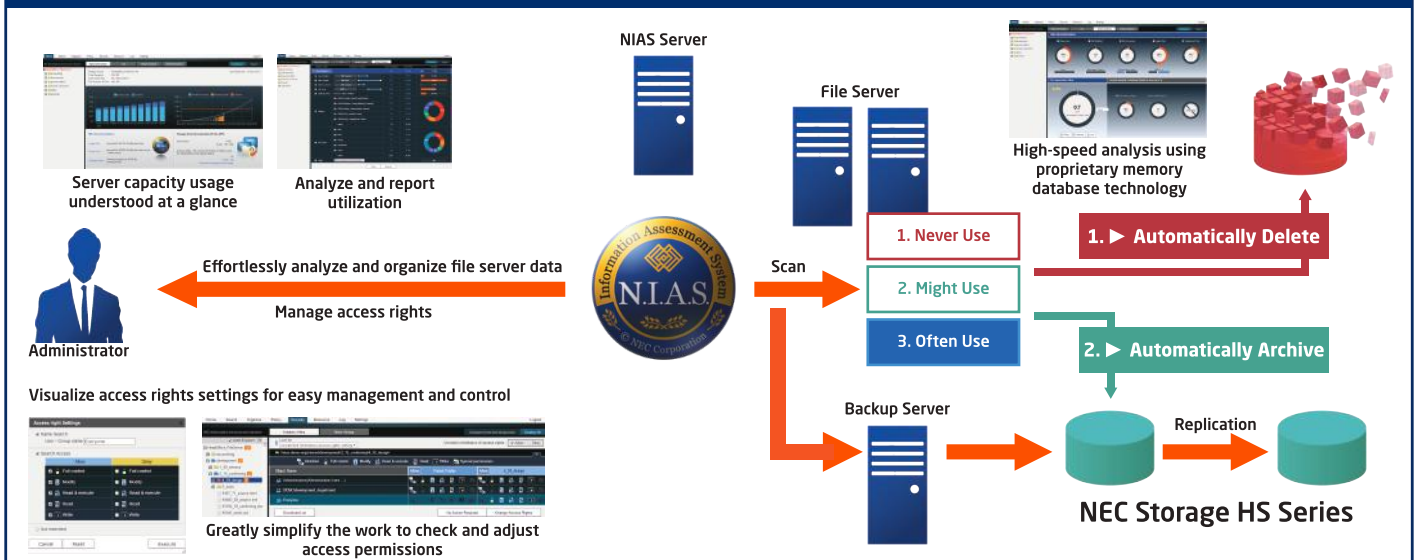

Access Control

NIAS helps enterprises detect and adjust inappropriate access permissions, thereby reducing information security risks.

System Overview

Part 2: Highly reliable dedupe storage for backup, archival and DR solution.
NEC Storage HS Series will revolutionize all your backup and archival work.

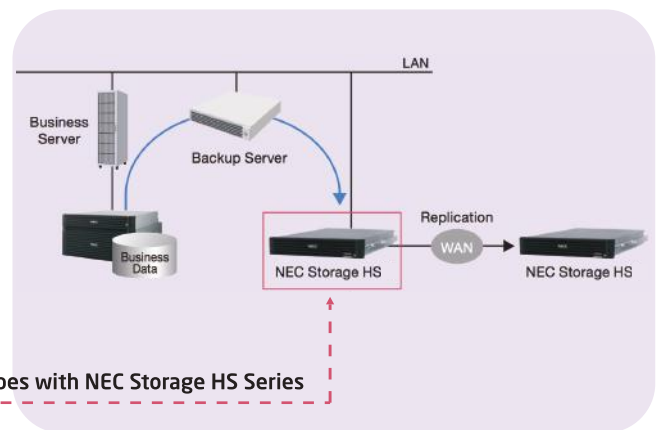

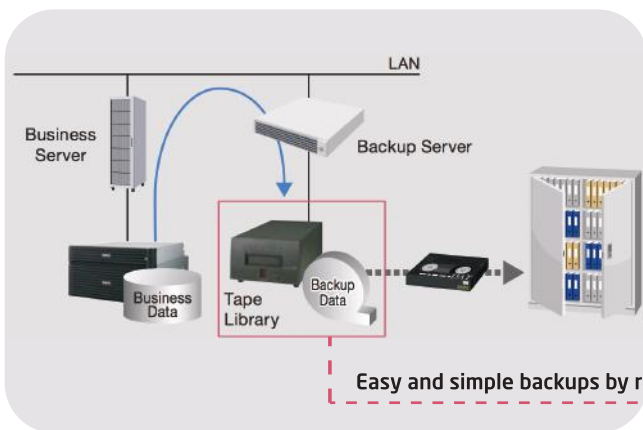

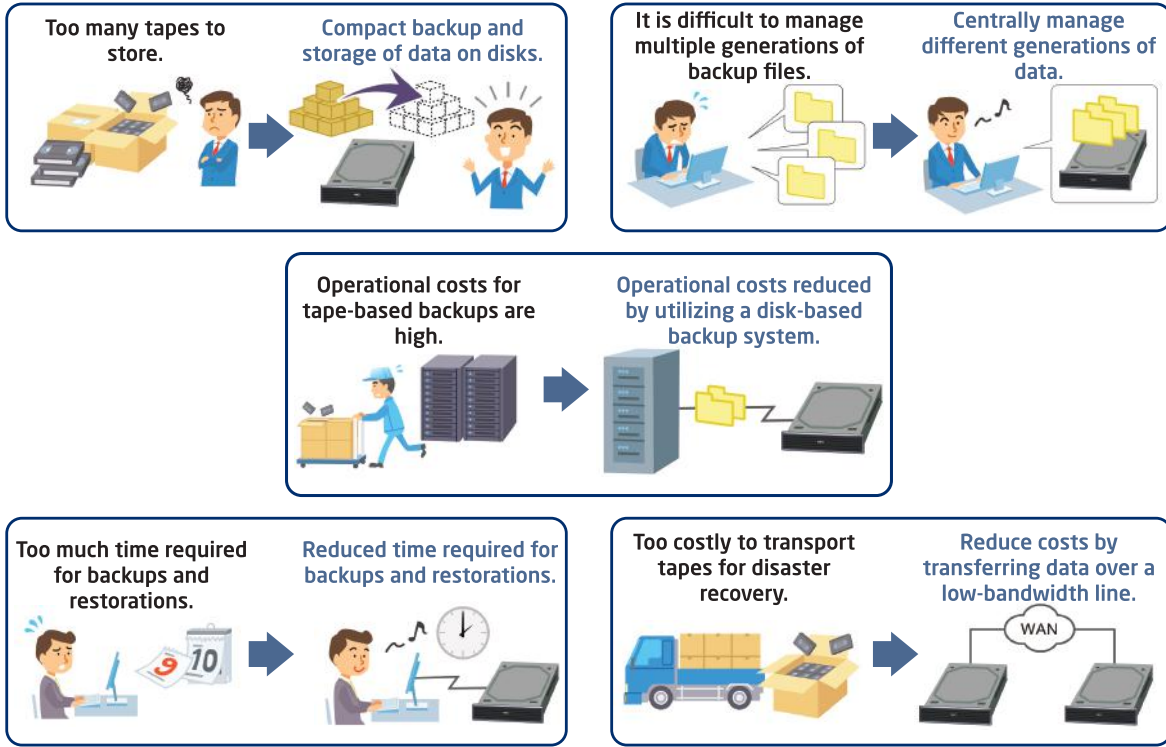

Simple & Smart Backup/Archive

NEC Storage HS Series

Economical, efficient & Reliable

The era of Big Data is here. New business values and services are created by huge amounts of data, and there are growing needs for storage platforms that backup/archive such important data efficiently and safely.

NEC Storage HS Series is advanced deduplication backup/archive storage solution that satisfies both present and future requirements. It offers low-cost operation compared to tape-based storage systems, while its scale-out capability accommodates changes quickly. Additionally, its reliability surpass that of RAID systems, and it provides next-generation disk-based backup environment.

Easy and simple backups by replacing tapes with NEC Storage HS Series
